Project Name	Smart Fashion Recommender Application

CREATING REPOSITORY IN IBM CLOUD:

The screenshot shows a dark-themed dialog box titled "Create repository" with a close button (X) in the top right corner. The dialog contains two numbered steps for creating a repository:

1. Tag an image to point to this registry. Choose a local image, target namespace, and target repository.

```
docker tag <local_image> icr.io/<my_namespace>/<my_repo>
```
2. Push the tagged image.

```
docker push icr.io/<my_namespace>/<my_repo>
```

Each code block is followed by a copy icon (two overlapping squares).

UPLOAD IMAGE TO IBM CONTAINER REGISTRY:

The screenshot displays the IBM Cloud Container Registry interface. The left sidebar contains the following navigation items:

- Quick start
- Namespaces (1)
- Repositories (1)**
- Images (1)
- Trash (0)
- Settings

The main content area is titled "Repositories". It features a "Location" dropdown menu set to "Global". Below this is a search bar and a "Create +" button. The repository list is as follows:

<input type="checkbox"/>	Name	Image count	Namespace	Last updated
<input type="checkbox"/>	 ibmproj icr.io/myproj/ibmproj	1	myproj	4 days ago

At the bottom of the table, there is a pagination control showing "Items per page: 25" and "1-1 of 1 item".
